Proud member of

## The Sani360 Advantage

### Electrostatic Spraying

Electrostatic spraying delivers charged droplets that are actively attracted to surfaces, including the back sides and crevices, for complete wrap-around disinfection coverage. This also allows for immediate re-entry into a sanitized area, unlike fogging which causes solutions to linger in the air.

### 100% Botanical Disinfectant

Our plant-based disinfectant is safe for use on food surfaces and children's toys yet powerful enough to kill mold and illness-causing viruses including HIV and COVID-19.

### Sanitizing Experts

Our network of sanitizing experts have been trained on proper disinfecting techniques. We require thorough safety and hygiene practices and are bonded & insured to protect your homes and businesses.

### Book Seamlessly Online
